Stratigraphic Analysis of Layered Deposits Ömer Elitok,2012-04-27 Stratigraphy, a branch of geology, is the science of describing the vertical and lateral relationships of different rock formations formed through time to understand the earth history. These relationships may be based on lithologic properties (named lithostratigraphy), fossil content (labeled biostratigraphy), magnetic properties (called magnetostratigraphy), chemical features (named chemostratigraphy), reflection seismology (named seismic stratigraphy), age relations (called chronostratigraphy). Also, it refers to archaeological deposits called archaeological stratigraphy. Stratigraphy is built on the concept the present is the key to the past which was first outlined by James Hutton in the late 1700s and developed by Charles Lyell in the early 1800s. This book focuses particularly on application of geophysical methods in stratigraphic investigations and stratigraphic analysis of layered basin deposits from different geologic settings and present continental areas extending from Mexico region (north America) through Alpine belt including Italy, Greece, Iraq to Russia (northern Asia).

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two

years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Global Outlaws Carolyn Nordstrom,2007 A deeply insightful book that connects the dots of the hidden systems that have subverted democracy and caused the type of desperation and anger that result in a 9/11. A book that opens our awareness.--John Perkins, author of The New York Times bestseller Confessions Of An Economic Hit Man Anyone interested in global economic crime should read this book.--Charmian Gooch, a founding director of Global Witness Global Outlaws is a revealing book about a global trend whose importance is still far from being fully recognized.--Moises Naim, Editor in Chief of Foreign Policy Magazine and author of Illicit: How Smugglers Traffickers and Copycats are Hijacking the Global Economy Carolyn Nordstrom's important new book takes us on a dark journey through war-torn landscapes riddled with corruption, violence, and gross inequalities. It is a compelling study--one guided by the norms of scholarly research but also written out of deeply felt experience. A book infused by anger, compassion, but also hope.--Andrew Mack, University of British Columbia This is a fascinating, insightful, and important ethnographic study of the intersection of crime, finance, and power in the illegal, 'informal', or underground economy. I have read all of Carolyn Nordstrom's books, and this is the best one yet.--Jeff Sluka, Massey University Carolyn Nordstrom's Global Outlaws is a rare and remarkable fusion of economic anthropology and travel writing. The prose is highly engaging without being sensationalistic. This is a timely and fascinating read for anyone looking for an on-the-ground account of the clandestine underside of globalization.--Peter Andreas, co-author of Policing the Globe: Criminalization and Crime Control in International Relations Carolyn Nordstrom is the best fieldworker in anthropology, bar none. Yet again she has pioneered new fieldsites and new forms of ethnography in this book, as well as presented a new framework for viewing economics and economic power. This is undoubtedly a highly important work that sets new frontiers for anthropology.--Monique Skidmore, Australian National University

Pacific Pidgins and Creoles Darrell T. Tryon,Jean-Michel Charpentier,2011-05-12 Pacific Pidgins and Creoles discusses the complex and fascinating history of English-based pidgins in the Pacific, especially the three closely related Melanesian pidgins: Tok Pisin, Pijin, and Bislama. The book details the central role of the port of Sydney and the linguistic synergies between Australia and the Pacific islands in the late 18th and early 19th centuries, the role of Pacific islander plantation labor overseas, and the differentiation which has taken place in the pidgins spoken in the Melanesian island states in the 20th century. It also looks at the future of Pacific pidgins at a time of increasing vernacular language endangerment.

Understanding Roman Inscriptions Lawrence Keppie, 2002-09-11 Lawrence Keppie's book offers the non-specialist a comprehensive and enjoyable guide to understanding the texts of Roman inscriptions, as well as explaining the numerous different contexts in which they were produced. Every area of Roman life is covered, including: * the emperor * temples and altars to the gods * imperial administration * gravestones and tomb monuments * local government and society * the army and the frontiers * Christianity * trade, commerce and the economy * the later Roman Empire. For each inscription cited, the book provides the original Latin, an English translation and a commentary on the piece's significance. Illustrated with more than 80 photos and drawings, this is the ideal introduction to the most important source for the history and organisation of the Roman Empire.

21st Century Skills James A. Bellanca, 2010-06-01 This anthology introduces the Framework for 21st Century Learning from the Partnership for 21st Century Skills as a way to re-envision learning and prepare students for a rapidly evolving global and technological world. Highly respected education leaders and innovators focus on why these skills are necessary, which are most important, and how to best help schools include them in curriculum and instruction.

Knowledge and Power in a South Pacific Society Lamont Lindstrom, 1990 Lindstrom (anthropology, U. of Tulsa) is the first ethnologist to apply a comprehensive Foucaultian perspective to a Pacific (Melanesian) society, in order to investigate how the people of Tanna create, exchange, and consume knowledge. He has constructed a conversational model of society from the many disparate voices of the island. Annotation copyrighted by Book News, Inc., Portland, OR

A Study of Inscribed Material from Roman Britain Marilynne E. Raybould, 1999 Raybould aims to test the hypothesis that literacy was largely an accomplishment of an educated, literate, social elite in Roman Britain, by examining surviving inscriptions from the area of religion, working and domestic life, and funerary customs.

Yurok-Karok Basket Weavers Lila Morris O'Neale, 1995 Lila O'Neale's Yurok-Karok Basket Weavers, first published in 1932, remains one of the finest and most comprehensive books devoted to American Indian basketry. In contrast to the typical treatment of tribal arts in her day, which saw them as homogeneous, anonymous, and conservative, O'Neale regarded the weavers as individuals, with personal styles and outlooks and a capacity for innovation. A pioneer in the study of Native American art, she presented the art from the weaver's point of view. In addition to an introduction by O'Neale scholar Margot Schevill, this edition includes an appendix listing the identities and tribal affiliations of O'Neale's 43 consultants.
