Generation on a Tightrope Arthur Levine, Diane R. Dean, 2012-07-19 Today's college students feel as if they are crossing an abyss between their dreams and the reality of an uncertain future. They are a generation seeking stability in a time of profound and accelerating change. They want government and our other social institutions to work in a time when they're broken; they cling to the American Dream in an age of diminished expectations. They are walking a tightrope, attempting to balance digital connectedness and personal isolation, global citizenship and local vision, commonality and difference in the most diverse generation in American history, and a desire to be treated as mature adults while being more dependent on their parents than previous college students. Generation on a Tightrope offers a compelling portrait of today's

undergraduate college students that sheds light on their attributes, expectations, aspirations, academics, attitudes, values, beliefs, social lives, and politics. Based on research of 5,000 college students and student affairs practitioners from 270 diverse college campuses, the book explores the similarities and differences between today's generation of students and previous generations. The authors examine the myriad forces that have shaped these students and will continue to shape them as they prepare to meet the future. The first two volumes in this series exploring the psyche of college students, *When Dreams and Heroes Died* (1980) and *When Hope and Fear Collide* (1998), offered thoughtful and accurate profiles of the students of the 1980s and 1990s. As *Generation on a Tightrope* clearly reveals, today's students need a very different education than the undergraduates who came before them: an education for the 21st Century, which colleges and universities are ill-equipped to offer and which will require major changes of them to provide. Painting a realistic picture of today's college students, the authors offer guidance to higher education professionals, researchers, practitioners, policymakers, employers, parents, and the public. The book's insights can help them equip students for the world they face and the world they will help to create.

Receptors Clare Stanford, Roger W. Horton, 2001 Given the number of exciting developments across the whole spectrum of receptor research in recent years, the editors have not restricted themselves to one particular approach or class of receptors. Thus the studies within range from G protein-coupled surface receptors, to the delivery of antisense DNA inside living cell systems. A distinguished team of contributors cover these diverse areas, identifying any difficulties likely to be encountered and appropriate steps to overcome them. Wherever appropriate, the theoretical basis of each topic is explained

first so that the results emerging from the practical procedures can be fully understood. Anyone with an interest in receptor structure and function will find this book an invaluable resource.

The Undergraduate Experience Peter Felten, John N. Gardner, Charles C. Schroeder, Leo M. Lambert, Betsy O. Barefoot, Freeman A. Hrabowski, 2016-05-16 A clear, practical framework for getting higher education back on track *The Undergraduate Experience* is a guide for significantly improving student learning and institutional performance in the rapidly changing world of higher education. Written by recognized experts in undergraduate education, this book encourages college and university leaders to rethink current practices that fragment the student experience, and to focus on creating powerful,

integrated undergraduate learning for all students. Drawing from their own deep experience and the latest research, the authors reveal key principles that enable institutional change and enhance student outcomes in any higher education setting. The book provides a practical framework for achieving excellence in undergraduate education by focusing on: Learning Relationships Expectations Alignment Improvement Leadership The value of an undergraduate education is under greater scrutiny than ever before, and campus leaders must be able to convey the value of their institutions to students, boards, donors, and legislators. Is a college or university degree worth the increasing cost? Are today's students academically adrift? What's the difference between a degree and an education? Responding to these questions requires focused action by individuals and institutions. The Undergraduate Experience offers practical guidance for creating and sustaining excellence in the face of disruption and change in higher education.

The Exocrine Pancreas Stephen Pandol, 2011 The secretions of the exocrine pancreas provide for digestion of a meal into components that are then available for processing and absorption by the intestinal epithelium. Without the exocrine pancreas, malabsorption and malnutrition result. This chapter describes the cellular participants responsible for the secretion of digestive enzymes and fluid that in combination provide a pancreatic secretion that accomplishes the digestive functions of the gland. Key cellular participants, the acinar cell and the duct cell, are responsible for digestive enzyme and fluid secretion, respectively, of the exocrine pancreas. This chapter describes the neurohumoral pathways that mediate the pancreatic response to a meal as well as details of the cellular mechanisms that are necessary for the organ responses,

including protein synthesis and transport and ion transports, and the regulation of these responses by intracellular signaling systems. Examples of pancreatic diseases resulting from dysfunction in cellular mechanisms provide emphasis of the importance of the normal physiologic mechanisms.
