Making of a Satellite Centre Prem Shanker Goel,2021-08-23 This book tells the story of the evolution of the Satellite Center which started from a small Satellite Systems Division in 1967 with a handful of engineers to a vibrant R&D center which is playing the lead role in the Indian Satellite Program. India's space program is unique as it is driven by societal applications. The Indian Space Research Organisation (ISRO) has centers dedicated to various space applications. The ISRO Satellite Centre, now known as the UR Rao Satellite Centre (URSC), has evolved as lead center for Satellite Technology over five decades and has developed state-of-the-art satellites for applications such as remote sensing, satellite communication and space science. Through the story of URSC, the book describes the challenges of putting together new research and development centers and programs and conveys the importance of leadership and project management skills required to undertake such a task. This book is of interest to researchers, professionals, and administrators involved in the development of new R&D facilities and also to space scientists and space enthusiasts across the world.

*An Introduction to Applying Satellite Remote Sensing to Disaster Management* Kazuya Kaku,2019-10-15 This study on the application of satellite remote sensing in disaster management is unique in the sense that it is based on 13 years of empirical study, takes human factors (users) into account. It provides an overview of satellite remote sensing, detailing how it works and for what fields of disaster management it can be used. This book will particularly appeal to practitioners (such as disaster responders, policy makers, and administrative officials) and researchers in the field of disaster management, as well as researchers in the satellite-remote-sensing field.

*ISRO* R. Aravamudan,2017-02-20 ISRO pioneer R. Aravamudan narrates the gripping story of the people who built India's space research programme and how they did it - from the rocket engineers who laid the foundation to the savvy young engineers who keep Indian spaceships flying today. It is the tale of an Indian organization that defied international bans and embargos, worked with laughably meagre resources, evolved its own technology and grew into a major space power. Today, ISRO creates, builds and launches gigantic rockets which carry the complex spacecraft that form the neural network not just of our own country but those of other countries too. This is a made-in-India story like no other.

**India's Rise as a Space Power** U. R. Rao,2014

*The Indian Space Programme* Gurbir Singh,2017-10-17 Fifty years in the making, India's Space Programme is fulfilling the vision of its founders and delivering services from space that touch the lives of 1.3 billion people every day. In addition to operating a collection of satellites for weather, Earth observation, navigation and communication today, India has a spacecraft orbiting Mars and a space telescope in Earth orbit. This book provides the big picture of India's long association with science, from historical figures like Aryabhata and Bhaskara to Homi Bhabha and Vikram Sarabhai, the key architects of its space program. It covers the scientific contribution of Indian scientists during the European Enlightenment and industrial revolution. It traces the technological development of Tipu Sultan's use of rockets for war in the 1780s; the all-but-forgotten contribution of Stephen H Smith's use of rockets as a means of transport in 1935 in northern India; and the emergence of Sriharikota - India's spaceport, the heart of India's modern Space Programme. • A detailed account of how a fishing village in Kerala was transformed into a space centre and used to launch India's first rocket into space on 21 November 1963. • A detailed summary of India's space infrastructure - launch vehicles, deep space network, Telemetry, Tracking and Command and space assets in orbit. • Description of how the ordinary people of India benefit from the services delivered by the space programme • Why India chose to go to the Moon and Mars and how it got there. • The prospects for India's ambitions in space for human spaceflight, national security and scientific exploration • An analysis of how India's Space Programme may play out on the global stage. Will it compete or collaborate with China, USA and Russia in space? This detailed work, in 645

pages, 29 tables and 9 appendices, is richly illustrated with 140+ illustrations (some images published for the first time) and supported by over 1,000 references. It is written for the non-specialist, offering a big-picture view.
