**Art and Answerability** M. M. Bakhtin,2011-01-01 Mikhail Bakhtin (1895-1975) is one of the preeminent figures in twentieth-century philosophical thought. *Art and Answerability* contains three of his early essays from the years following the Russian Revolution, when Bakhtin and other intellectuals eagerly participated in the debates, lectures, demonstrations, and manifesto writing of the period. Because they predate works that have already been translated, these essays—*Art and Answerability*, *Author and Hero in Aesthetic Activity*, and *The Problem of Content, Material, and Form in Verbal Art*—are essential to a comprehensive understanding of Bakhtin's later works. A superb introduction by Michael Holquist sets out the major themes and concerns of the three essays and identifies their place in the canon of Bakhtin's work and in intellectual history. The introduction, together with Vadim Liapunov's scholarly gloss, makes these essays accessible to students as well as scholars.

*Part-Time Work in the Nordic Region II* Ida Drange,Cathrine Egeland,2014-11-12 Gender equality in the labour market is a key topic in the Nordic cooperation on gender equality. The Nordic Council of Ministers has asked NIKK, Nordic Information on Gender, to coordinate the project *Part-Time Work in the Nordic Region*. The aim of the project is to shed light on and analyse part-time work in the Nordic region, develop reports and arrange conferences. During the Icelandic presidency of the Nordic Council of Ministers in 2014, the project followed up the earlier study. This second report is a research overview on the arguments used to explain part-time work and gender in the Nordic countries. Further, the report describe relevant measures taken by different actors in the labour market and the political sphere in order to reduce foremost women's part-time work. The researchers Ida Drange and Cathrine Egeland wrote the report on a request by NIKK.

**The Ballad of a Broken Nose** Arne Svingen,2016-06-14 From award-winning Norwegian author Arne Svingen comes “an uplifting coming-of-age story” (*The Wall Street Journal*) about a relentlessly positive teenager who uses his love of opera to cope with his less-than-perfect home life. Bart is an eternal optimist. At thirteen years old, he’s had a hard life. But Bart knows that things won’t get any better if you have a negative attitude. His mother has pushed him into boxing lessons so that Bart can protect himself, but Bart already has defense mechanisms: he is relentlessly positive...and he loves opera. Listening to—and singing—opera is Bart’s greatest escape, but he’s too shy to share this with anyone. Then popular Ada befriends him

and encourages him to perform at the school talent show. Ada can't keep a secret to save her life, but Bart bonds with her anyway, and her openness helps him realize that his troubles are not burdens that he must bear alone. The Ballad of a Broken Nose is a sweet story about bravery, fear, bullying, sports, and music. But most of all it is about the important days of your life, days when everything seems to happen at once and nothing will ever be the same again.

**How I See Philosophy** Friedrich Waismann,1968-06-18

**The Pecking Order** Dalton Conley,2009-02-25 The family is our haven, the place where we all start off on equal footing — or so we like to think. But if that's the case, why do so many siblings often diverge widely in social status, wealth, and education? In this groundbreaking and meticulously researched book, acclaimed sociologist Dalton Conley shatters our notions of how our childhoods affect us, and why we become who we are. Economic and social inequality among adult siblings is not the exception, Conley asserts, but the norm: over half of all inequality is within families, not between them. And it is each family's own "pecking order" that helps to foster such disparities. Moving beyond traditionally accepted theories such as birth order or genetics to explain family dynamics, Conley instead draws upon three major studies to explore the impact of larger social forces that shape each family and the individuals within it. From Bill and Roger Clinton to the stories of hundreds of average Americans, here we are introduced to an America where class identity is ever changing and where siblings cannot necessarily follow the same paths. This is a book that will forever alter our idea of family.

Your Superstar Brain Kaja Nordengen,2018-06-07 **\*\*THE INTERNATIONAL BESTSELLER\*\*** 'A brilliant book' - Dagbladet Why does the brain work the way it does? Can eating certain foods improve your memory? Can you activate the parts of the brain you don't use? Can you smile yourself to happiness? What is free will, and do we really possess it? These big questions, and many more, are investigated to uncover all the secrets of your most wondrous, mysterious and irreplaceable organ. Your brain makes you who you are - it is the root of your personality and intelligence. It learns languages, creates memories and interprets complex patterns. But it is also responsible for your bad decisions and it rewards addictive behaviours. In *Your Superstar Brain*, neuroscientist Dr Kaja Nordengen describes in mesmerising detail how the brain works - both how it's physically constructed with neurones, synapses and the cerebral cortex, but also how it functions on a more abstract level - everything from what happens when we fall in love to where we find our sense of self. Join Dr Kaja Nordengen on her fascinating journey through the many unexplored territories of the intricate human brain, and find out why your brain is truly a superstar.

*Exploring Health Communication* Kevin Harvey,Nelya Koteyko,2013 This textbook aims to bring together many of the various linguistic strands in health communication, while maintaining an interdisciplinary focus on method and theory.

Computer-Mediated Communication Systems Elaine B. Kerr,Starr Roxanne Hiltz,2013-09-03 *Computer-Mediated Communication Systems: Status and Evaluation* synthesizes current knowledge about computerized conferencing systems,

electronic mail, and office information-communication systems. It should be of interest both to students and researchers studying this new form of electronic communication and to organizations that are planning the installation of electronic mail or other computer-mediated communication systems and that need to be aware of the information gleaned from the studies presented here. The book is organized into four main sections, focusing on the following issues: (1) What are the important considerations in designing software or choosing a system from the many available options and capabilities? (2) What factors determine whether such systems are likely to be accepted or rejected? (3) What are the likely impacts of such systems upon the individuals, groups, and organizations which use them? It is not the economic costs and benefits, but the social problems and payoffs in the form of enhanced performance and organizational efficiency that should be the main considerations in deciding whether or not to use a computer-mediated communication system. (4) Given the conditional nature of many of the possible impacts, no system should be implemented without formal evaluation and feedback from users to guide the implementation. The major kinds of evaluational strategies that have been successfully employed are described in this book.

**The Cultural Construction of Norden** Øystein Sørensen,Bo Stråth,1997

Qualitative Research as Stepwise-Deductive Induction Aksel Tjora,2018-08-06 This book provides thorough guidance on various forms of data generation and analysis, presenting a model for the research process in which detailed data analysis and generalization through the development of concepts are central. Based on an inductive principle, which begins with raw data and moves towards concepts or theories through incremental deductive feedback loops, the 'stepwise-deductive induction' approach advanced by the author focuses on the analysis phase in research. Concentrating on creativity, structuring of analytical work, and collaborative development of generic knowledge, it seeks to enable researchers to extend their insight of a subject area without having personally to study all the data generated throughout a project. A constructive alternative to Grounded Theory, the approach advanced here is centred on qualitative research that aims at developing concepts, models, or theories on basis of a gradual paradigm to reduce complexity. As such, it will appeal to scholars and students across the social sciences with interests in methods and the analysis of qualitative data of various kinds.

Problems of Reflection in the System of Education Niklas Luhmann,Karl-Eberhard Schorr,2000 From the perspective of system theory this text traces the way in which the system of education reflects its own unity and its own position in modern society.

*Minimum Wages* David Neumark,William L. Wascher,2008 A comprehensive review of evidence on the effect of minimum wages on employment, skills, wage and income distributions, and longer-term labor market outcomes concludes that the minimum wage is not a good policy tool.

*Ramblin' Man: The Life and Times of Woody Guthrie* Ed Cray,2006-03-17 Winner of the Oklahoma Book Award and the

Deems Taylor ASCAP Award for Best Folk, Pop, or Jazz Biography A beautiful job...In exploring the nuances of Guthrie's work, Cray's exacting style is pitch-perfect. —Los Angeles Times Book Review A patriot and a political radical, Woody Guthrie captured the spirit of his times in his enduring songs. He was marked by the FBI as a subversive. He lived in fear of the fatal fires that stalked his family and of the mental illness that snared his mother. At forty-two, he was cruelly silenced by Huntington's disease. Ed Cray, the first biographer to be granted access to the Woody Guthrie Archive, has created a haunting portrait of an American who profoundly influenced Pete Seeger, Bob Dylan, Bruce Springsteen, and American popular music itself.

**Bright Satanic Mills** Alan Harding,Stephan Laske,2016-04-15 Recent years have seen a growing emphasis upon the need for universities to contribute to the economic, social and environmental well-being of the regions in which they are situated, and for closer links between the university and the region. This book brings together a cross-disciplinary and cross-national team of experts to consider the reasons for, and the implications of, the new relationship between universities and territorial development. Examining the complex interactions between the 'inner life' of the university and its external environment, it poses the question: 'Can the modern university manage the governance and balancing of these, sometimes conflicting, demands'? Against a backdrop of ongoing processes of globalization, there is growing recognition of the importance of sub-national development strategies - processes of regionalization, governmental decentralization and sub-national mobilization, that provide a context for universities to become powerful partners in the process of managing sub-national economic, social and environmental change. Allied to this, the continued evolution of the knowledge economy has freed up location decisions within knowledge-intensive industries, while paradoxically innovation in the production of goods and services has become still more 'tied' to locations that can nurture the human and intellectual capital upon which those industries rely. Thus cities and regions in which higher education services are concentrated have, or are thought to have, a competitive advantage. With universities facing ever increasing pressures of commercialization, which deepen the engagement between universities and external stakeholders, including those based in their localities, the tension between the university's academic (basic research and teaching) mission and external demands has never been greater. This book provides a long overdue analysis, bringing all the competing issues together, synthesizing the key conceptual debates and analyzing the way in which they have been experienced in different local, regional and national contexts and with what effects.

**Nursing Research** Denise F. Polit,Cheryl Tatano Beck,2020-02-12 Research methodology is a dynamic enterprise. Even after writing 10 editions of this book, we have continued to draw new material and inspiration from ground-breaking advances in research methods and in nurse researchers' use of those methods. It is thrilling to share many of those developments in this new edition. We expect that many of the new methodologic and technological enhancements will be translated into powerful evidence for nursing practice. Four years ago, we considered the 10th edition as a watershed edition of a classic textbook, having added two new chapters. We are persuaded, however, that this 11th edition is even better than the previous one. We have retained many features that made this book a classic textbook and resource, including its focus on research as a support for evidence-based nursing, but have introduced important innovations that we hope will help to shape the future of nursing research--
