*Blue Water Classics* Andrew Wilson, Di Pearson, 2020-11 This new book on Australia's most famous blue water classic, the Sydney Hobart Yacht Race, will become a collector's item for anyone who has an interest in the race. Participants and spectators alike will revel in photographer Andrew Wilson's amazing array of intimate portraits of some of the absolute legends of the race, including owners, crew, administrators and even the odd journalist. Backed by extensive interviews from journalist and race media manager Di Pearson, who probably knows more about the race than anyone else alive, this is a book that examines the people who make the race. It is not about the boats. As David Kellett AM says in the foreword, Andrew has covered all aspects of the race from the preparation to the finish and everything in between, including the personalities involved in the control of the race, the safe haven of Eden and the officers of the vital search and rescue organisations. A great insight into what goes on behind the scenes each year. If you have competed in the race, are planning to in the future, or if you just love great stories about people doing exceptional things under difficult conditions, then you will love this book. It packs an enormous amount of content and some truly remarkable photographs into its 520 pages. It is a book you can immerse yourself in for days on end. All the adrenaline and drama of the great race is here - the heroes, the villains, the folklore and everything in between. Settle in for one of the best yachting reads of your life.

**A Source Book of Australian History** Gwendolen Swinburne,2022-06-13 A Source Book of Australian History is a concise full history of Australia from the discovery of Tasmania to the National Australian Convention and the establishment of the Commonwealth of Australia. The book was aimed at students interested in learning the subject. Each chapter has a short synopsis at the beginning to better comprehend the subject.

**Celestial Navigation for Yachtsmen** Mary Blewitt,2013-09-21 The 12th edition of this bestselling book is proof of the success of Mary Blewitt's concise and clear style in explaining a particularly difficult skill, and it has been the bible for many generations of ocean navigators. Since this book was first published, the huge advances in electronic navigation have transported most offshore navigators to a world of press-button convenience. However, there is still a vital need for traditional skills when things go wrong: batteries can fail, aerals go overboard, and electronics have been known to get wet. A bestseller for over 50 years, Celestial Navigation for Yachtsmen is a model of simplicity and clarity. The worked examples require only straightforward addition and subtraction, which explains why this book has truly earned its reputation for admirable conciseness and for making a tricky subject easy to understand. 'The bible of navigation for generations of yachtsmen... worth its weight in gold' Sailing

*Exploration of the Seas* National Research Council,Division on Earth and Life Studies,Ocean Studies Board,Committee on Exploration of the Seas,2003-11-04 In the summer of 1803, Thomas Jefferson sent Meriwether Lewis and William Clark on a journey to establish an American presence in a land of unqualified natural resources and riches. Is it fitting that, on the 200th anniversary of that expedition, the United States, together with international partners, should embark on another journey of exploration in a vastly more extensive region of remarkable potential for discovery. Although the oceans cover more than 70 percent of our planet's surface, much of the ocean has been investigated in only a cursory sense, and many areas have not been investigated at all. Exploration of the Seas assesses the feasibility and potential value of implementing a major, coordinated, international program of ocean exploration and discovery. The study committee surveys national and international ocean programs and strategies for cooperation between governments, institutions, and ocean scientists and explorers, identifying strengths, weaknesses, and gaps in these activities. Based primarily on existing documents, the

committee summarizes priority areas for ocean research and exploration and examines existing plans for advancing ocean exploration and knowledge.
