The Battle for China's Past Moby Gao, 2008-02-20 Mao and his policies have long been demonized in the West, with the Cultural Revolution considered a fundamental violation of human rights. As China embraces capitalism, the Mao era is being denigrated by the Chinese political and intellectual elite. This book tackles the extremely negative depiction of China

under Mao in recent publications and argues that most people in China, including the rural poor and the urban working class, actually benefited from Mao's policies. Under Mao there was a comprehensive welfare system for the urban poor and basic health and education provision in rural areas. These policies are being reversed in the current rush towards capitalism. Offering a critical analysis of mainstream accounts of the Mao era and the Cultural Revolution, this book sets the record straight, making a convincing argument for the positive effects of Mao's policies on the well-being of the Chinese people.

Our Great Qing Johan Elverskog,2006-01-01 Although it is generally believed that the Manchus controlled the Mongols through their patronage of Tibetan Buddhism, scant attention has been paid to the Mongol view of the Qing imperial project. In contrast to other accounts of Manchu rule, *Our Great Qing* focuses not only on what images the metropole wished to project into Mongolia, but also on what images the Mongols acknowledged themselves. Rather than accepting the Manchu's use of Buddhism, Johan Elverskog begins by questioning the static, unhistorical, and hegemonic view of political life implicit in the Buddhist explanation. By stressing instead the fluidity of identity and Buddhist practice as processes continually developing in relation to state formations, this work explores how Qing policies were understood by Mongols and how they came to see themselves as Qing subjects.

Corporate Finance, Canadian Edition Jonathan Berk,David Stangeland,Peter M. DeMarzo,2021-04-20 A Canadian text should reflect Canadian realities, and show how they fit into the bigger picture. The Canadian tax system, for example, differs significantly from that of the United States regarding dividends, capital gains, capital cost allowance, leasing, and foreign subsidiary income and its taxation in the parent company. We use the relevant Canadian tax code to make the examples more realistic to students and to give them exposure to how Canadian taxation works. There are many institutional and market differences between Canada and the United States. We have incorporated information on both countries' institutions and markets and often include comparisons with other countries.--

The Geography of Innovation M.P. Feldman,2013-06-29 This book offers a geographic dimension to the study of innovation and product commercialization. Building on the literature in economics and geography, this book demonstrates that product innovation clusters spatially in regions which provide concentrations of the knowledge needed for the commercialization process. The book develops a conceptual model which links the location of new product innovations to the sources of these knowledge inputs. The geographic concentration of this knowledge forms a technological infrastructure

which promotes information transfers, and lowers the risks and the costs of engaging in innovative activity. Empirical estimation confirms that the location of product innovation is related to the underlying technological infrastructure, and that the location of the knowledge inputs are mutually reinforcing in defining a region's competitive advantage. The book concludes by considering the policy implications of these findings for both private firms and state governments. This work is intended for academics, policy practitioners and students in the fields of innovation and technological change, geography and regional science, and economic development. This work is part of a larger research effort to understand why the location of innovative activity varies spatially, specifically the externalities and increasing returns which accrue to location. xi

Acknowledgements This work has benefitted greatly from discussions with friends and colleagues. I wish to specifically note the contribution of Mark Kamlet, Wes Cohen, Richard Florida, Zoltan Acs and David Audretsch. Sacred Mandates Timothy Brook, Michael van Walt van Praag, Miek Boltjes, 2018-05-21 Contemporary discussions of international relations in Asia tend to be tethered in the present, unmoored from the historical contexts that give them meaning. *Sacred Mandates*, edited by Timothy Brook, Michael van Walt van Praag, and Miek Boltjes, redresses this oversight by examining the complex history of inter-polity relations in Inner and East Asia from the thirteenth century to the twentieth, in order to help us understand and develop policies to address challenges in the region today. This book argues that understanding the diversity of past legal orders helps explain the forms of contemporary conflict, as well as the conflicting historical narratives that animate tensions. Rather than proceed sequentially by way of dynasties, the editors identify three “worlds”—Chingssid Mongol, Tibetan Buddhist, and Confucian Sinic—that represent different forms of civilization authority and legal order. This novel framework enables us to escape the modern tendency to view the international system solely as the interaction of independent states, and instead detect the effects of the complicated history at play between and within

regions. Contributors from a wide range of disciplines cover a host of topics: the development of international law, sovereignty, state formation, ruler legitimacy, and imperial expansion, as well as the role of spiritual authority on state behavior, the impact of modernization, and the challenges for peace processes. The culmination of five years of collaborative research, *Sacred Mandates* will be the definitive historical guide to international and intrastate relations in Asia, of interest to policymakers and scholars alike, for years to come.

The Greening of the Automotive Industry G. Calabrese, 2016-04-12 An examination of the greening of the automotive industry by the path dependence of countries and carmakers' trajectories. Three sources of path dependency can be detected: business models, consumer attitudes, and policy regulations. The automobile is changing and the race towards alternative driving systems has started!

Frontier Encounters Franck Billé, Grégory Delaplace, Caroline Humphrey, 2012-08-01 China and Russia are rising economic and political powers that share thousands of miles of border. Despite their proximity, their interactions with each other - and with their third neighbour Mongolia - are rarely discussed. Although the three countries share a boundary, their traditions, languages and worldviews are remarkably different. *Frontier Encounters* presents a wide range of views on how the borders between these unique countries are enacted, produced, and crossed. It sheds light on global uncertainties: China's search for energy resources and the employment of its huge population, Russia's fear of Chinese migration, and the precarious independence of Mongolia as its neighbours negotiate to extract its plentiful resources. Bringing together anthropologists, sociologists and economists, this timely collection of essays offers new perspectives on an area that is currently of enormous economic, strategic and geo-political relevance.
