The Changing Energy Mix Paul Meier, 2020 The energy mix is changing, and renewable energy is growing in importance. If you were born before 1989, you lived in a U.S. where there was no electricity generated from either wind or solar power and very little from geothermal and biomass. Now, in 2018, the combined generation from wind and solar has surpassed hydroelectricity. Fourteen states now generate more than 10% of their electricity from wind and three generate more than 30%. And bioethanol, produced from corn grain, now makes up 10% of the U.S. gasoline market. Changes have also occurred in the nonrenewable energy mix. Coal, which was responsible for 53% of the U.S. electricity generation in 1998 is now only 28%, as natural gas has taken the leadership role, surpassing coal in 2015 as the primary energy for producing electricity. Similarly, the world did not see any electricity generation from wind until 1985 and none from solar until 1989. Now solar plus wind generate 7% of the worldwide electricity. The worldwide demand for all energy types is also increasing rapidly, as energy usage has increased 84% over the last twenty years. This book makes a systematic comparison of twelve different energy types to help understand the driving forces for this changing energy mix. Twelve common criteria are used to provide tools to make these comparisons, such as proven reserves, the levelized cost for each energy type, energy balances, environmental issues, and the energy footprint. Proven reserves are also projected for each renewable energy type-

Forgotten Americans Isabel Sawhill, 2018-09-25 A sobering account of a disenfranchised American working class and important policy solutions to the nation's economic inequalities One of the country's leading scholars on economics and social policy, Isabel Sawhill addresses the enormous divisions in American society—economic, cultural, and political—and what might be done to bridge them. Widening inequality and the loss of jobs to trade and technology has left a significant portion of the American workforce disenfranchised and skeptical of governments and corporations alike. And yet both have a role to play in improving the country for all. Sawhill argues for a policy agenda based on mainstream values, such as family, education, and work. While many have lost faith in government programs designed to help them, there are still trusted institutions on both the local and federal level that can deliver better job opportunities and higher wages to those who have been left behind. At the same time, the private sector needs to reexamine how it trains and rewards employees. This book provides a clear-headed and middle-way path to a better-functioning society in which personal responsibility is honored and inclusive capitalism and more broadly shared growth are once more the norm.

Chasing Wrongs and Rights Elaine Pearson, 2022-09-07 The Australia Director at Human Rights Watch shares her experiences defending human rights – from human trafficking in Nepal to the 'drug war' in the Philippines to treatment of detainees in Papua New Guinea and in Australia – offering an extremely involving personal account of how far we've come, and how far we've got to go. Growing up in Perth, Elaine Pearson always dreamt of the wider world. Her British father and Singaporean-Chinese mother meant that her family extended beyond our shores, but it wasn't until later in life that she fully understood how her professional calling might have been influenced by personal history: she learned that her beloved maternal grandmother had been sold to an opera troupe as a child to save the family from starvation. As soon as she could, Elaine followed her interest in women's rights and people-trafficking, interviewing sex-workers and victims of trafficking on the streets of Bangkok and Amsterdam's red light district. Her experiences in Nepal and Nigeria profoundly shaped her understanding of how governments and NGOs need to protect the rights of victims, as well as how poverty, corruption and war drive trafficking in the first place. Elaine's story takes us on a panoramic survey of human rights across the world – into the UN committee rooms of New York and Geneva, as well as to the front-lines of Sri Lanka's search for those who disappeared in the country's civil war, examining death squad killings on the Philippines island of Mindanao and the detention of asylum seekers in Papua New Guinea. And her work on the appalling treatment of prisoners, many of whom are Aboriginal, vividly demonstrates that human rights abuses are something that happens at home as well as out in that wider world. In exploring human rights abuses and governments' failure to address them, *Chasing Wrongs and Rights* sometimes shows humanity at its worst. Just as often, though, we see people at their best – compassionate, resilient, determined. Deeply informative and inspiring, Elaine Pearson's story will leave you understanding how much needs to change, and how individuals can make a difference.

Witness Protection and Criminal Justice in Africa Suzzie Onyeka Oyakhire, 2023-06-30 This book examines the concept of witness protection which is still at an early developmental stage in several African countries including Nigeria, from a legal and institutional perspective. Recent developments in Nigeria highlight the need to clarify legal and conceptual issues within the existing legal framework for protecting witnesses. Using the Nigerian case study, the book illustrates some obscurities inherent in the concept of witness protection. These are highlighted around five critical areas: the definition of witness protection; the scope of beneficiaries requiring protection; the nature of crimes necessitating protection; the nature of protective measures; and the administrative control of witness protection. Specifically, this book draws from the existing literature and practices of witness protection and adopts two distinct perspectives: the criminal justice perspectives and human rights perspectives as heuristic tools for analysing the concept and to separate the disparate influences that shape how it is construed. These distinctions are utilised throughout the book as an integrated way of conceptualising the concept of witness protection. By discussing the practice of witness protection within the Nigerian context, the book contributes to African conversations on the topic of witness protection. The clarifications made in this book are utilised in making normative proposals for developing a legal framework for witness protection in Nigeria. They are also useful for other African countries interested in developing a witness protection framework as part of criminal justice reform. This book will serve as a reference point for legal scholars, researchers, academics, (postgraduate) students and policy makers interested in the concept of witness protection. It would also be useful for courses 'concerned with comparative criminology where there is an interest in developments in the Global South.'

US Infantryman in World War II (2) Robert S Rush, 2012-07-20 Between November 1942 and May 1945, US Army infantry units fought in eight named campaigns in the Mediterranean Theater. This title follows one soldier from enlistment in 1942, through training in a Replacement Training Center, assignment to the 1st Battalion 133d Regiment, 34th Infantry Division (Red Bull), and into combat. Among the battles covered are Fondouk Pass, Hill 609, Salerno, Monte Cassino, Anzio and the fighting in the Po Valley. A key focus is on the Heavy Weapons Company, which consisted of two machine gun platoons and one mortar platoon. The training and combat roles of the machine gunner's Military Occupational Specialty are discussed in detail.

Sexual Justice Alexandra Brodsky, 2021-08-24 A pathbreaking work for the next stage of the #MeToo movement, showing how we can address sexual harms with fairness to both victims and the accused, and exposing the sexism that shapes today's contentious debates about due process. Over the past few years, a remarkable number of sexual harassment victims have come forward with their stories, demanding consequences for their assailants and broad societal change. Each prominent allegation, however, has also set off a wave of questions – some posed in good faith, some distinctly not – about the rights of the accused. The national conversation has grown polarized, inflamed by a public narrative that wrongly presents feminism and fair process as warring interests. Sexual Justice is an intervention, pointing the way to common ground. Drawing on core principles of civil rights law, and the personal experiences of victims and the accused, Alexandra Brodsky details how schools, workplaces, and other institutions can – indeed, must – address sexual harms in ways fair to all. She shows why these allegations cannot be left to police and prosecutors alone, and outlines the key principles of fair proceedings outside the courts. Brodsky explains how contemporary debates continue the long, sexist history of “rape exceptionalism,” in which sexual allegations are treated as uniquely suspect. And she calls on readers to resist the anti-feminist backlash that hijacks the rhetoric of due process to protect male impunity. Vivid and eye-opening, at once

intellectually rigorous and profoundly empathetic, *Sexual Justice* clears up common misunderstandings about sexual harassment, traces the forgotten histories that underlie our current predicament, and illuminates the way to a more just world.

Our Social World Jeanne H. Ballantine, Kathleen Odell Korgen, 2022-09-30 The Eighth Edition of *Our Social World: Introduction to Sociology* inspires students to develop their sociological imaginations, to see the world and personal events from a new perspective, and to confront sociological issues on a day-to-day basis. The text is organized around the Social World model, a conceptual framework that demonstrates the relationships among individuals (the micro level); organizations, institutions, and subcultures (the meso level); and societies and global structures (the macro level). The consistent application of the Social World Model across chapters (represented in a visual diagram in the chapter openers) helps students develop the practice of using three levels of analysis, and to view sociology as an integrated whole, rather than a set of disparate subjects. This title is accompanied by a complete teaching and learning package in SAGE Vantage, an intuitive learning platform that integrates quality SAGE textbook content with assignable multimedia activities and auto-graded assessments to drive student engagement and ensure accountability. Unparalleled in its ease of use and built for dynamic teaching and learning, Vantage offers customizable LMS integration and best-in-class support.

ISIS Brian L. Steed, 2016-06-20 Providing up-to-date information for general readers as well as those well-informed about the Islamic State, this book offers an essential understanding of the rise of ISIS and its current influence in the Middle East as well as worldwide. ISIS—also referred to as ISIL, the Islamic State, or Daesh—began to assert its power and gain recognition for its militant and terroristic activities in April 2013. After the coordinated attacks in Paris on November 13th, 2015, ISIS has captured the full attention of observers in the West. This accessible book explains what ISIS is, what the group's goals are, what their members believe, and why their ranks are growing. Readers will gain an understanding of how ISIS is a unique group—one seeking to be the army of the righteous fighting to defeat the unbelievers and usher in the end of days—but that the extremist views of ISIS are an expression of a growing frustration with life in the Middle East and elsewhere shared by a larger community of non-state and post-state actors. The book provides an introduction that documents the origins of ISIS within the larger Al Qaeda organization during the Iraq War. The following chapters discuss the origins, development, and territorial expansion of ISIS in Syria and Iraq and examine the ideological motivations behind the emergence of ISIS, thereby enabling a nuanced understanding of the importance of ISIS in contemporary history. Other entries discuss individuals, events, and organizations that put ISIS in historical context in terms of contemporary events since the Iraq War into the present and explain the group's position within the complex conflict currently boiling in the Middle East.

Innovate to Dominate Tai Ming Cheung, 2022-08-15 In *Innovate to Dominate*, Tai Ming Cheung offers insight into why, how, and whether China will overtake the United States to become the world's preeminent technological and security power. This examination of the means and ends of China's quest for techno-security supremacy is required reading for anyone looking for clues as to the long-term direction of the global order. The techno-security domain, Cheung argues, is where national security, innovation, and economic development converge, and it has become the center of power and prosperity in the twenty-first century. China's paramount leader Xi Jinping recognizes that effectively harnessing the complex interactions among security, innovation, and development is essential in enabling China to compete for global dominance. Cheung offers a richly detailed account of how China is building a potent techno-security state. In *Innovate to Dominate* he takes readers from the strategic vision guiding this transformation to the nuts-and-bolts of policy implementation. The state-led top-down mobilizational model that China is pursuing has been a winning formula so far, but the sternest test is ahead as China begins to compete head-to-head with the United States and aims to surpass its archrival by mid-century if not sooner. *Innovate to Dominate* is a timely and analytically rigorous examination of the key strategies guiding China's transformation of its capabilities in the national, technological, military, and security spheres and how this is taking place. Cheung authoritatively addresses the burning questions being asked in capitals around the world: Can China become the dominant global techno-security power? And if so, when?
