Rodin Auguste Rodin, 1997 This classic exploration of erotic themes in Rodin's sculptures and drawings offers stunning visual and textual insight into the artist's work and ideas. More than 350 superbly reproduced images of selected sculptures and late drawings by Rodin document his obsession with sexuality, revealing the countless ways he depicted the subject: as a threat and challenge, but also as the source of all creative inspiration and passion. Augmenting these illustrations, ten essays by leading scholars explore the ramifications of Eros in Rodin's work, including such topics as the nature of the fragment, Rodin's relationship to the model, his religiosity, and his influence on his contemporaries as well as on future artists. In word and image, this volume deepens our understanding of the nineteenth century's premier sculptor.

Rodin and Eros Pascal Bonafoux, 2013-04-16 Rodin's erotic depictions of women in drawings, sculptures, plasters, bronzes, and marbles The theme of the erotic is ever present in the work of August Rodin, both in his sculptures and in his many drawings. Throughout his career, he depicted sexual desire in all its facets, in every mood from delicate innocence to frank intensity, bearing witness to an endless fascination with the flesh and a love of the female form. Taking a chronological path through Rodin's career, this is an intimate approach to the many faces of sex and sensuality in his body of work and in the society within which his art was forged, from mythological portrayals of passion to the context of contemporary erotic literature. The topics featured include his relationships with women, his friendships with poets and artists, and the controversy that his sculptures caused in the late nineteenth and early twentieth centuries, when French society was marked by a hypocritical disparity between public morals and private desires. In a 1916 interview, Rodin spoke out against his critics: They protest against the immorality of my work, they criticize me for loving women.... But they are incapable of understanding what I do. This witty and insightful book, packed with beautiful images, will shed new light on this intriguing

aspect of the artist's world and his skill at capturing the fleeting nature of pleasure in timeless art.

Masterpieces of the J. Paul Getty Museum: Decorative Arts Charissa Bremer-David, Catherine Hess, Jeffrey W. Weaver, Gillian Wilson, 1997-11-13 This beautifully illustrated work brings together more than one hundred objects from the J. Paul Getty Museum's collection of European decorative arts. Included here is a generous selection of French and Italian

furniture from the mid-sixteenth to the early nineteenth century. Masterpieces by André-Charles Boulle, Bernard (II) van Risenburgh, and others reveal the virtuoso craftsmanship that makes these objects such compelling examples of the furniture maker's art. Many of the Museum's finest pieces of porcelain, glass, and tin-glazed earthenware are also represented. Tapestries from Gobelins and Beauvais, bronze firedogs from Fontainebleau, and a lathe-turned ivory goblet of astonishing complexity from Saxony are among the other highlights of this handsome volume.

The Machine as Art/ The Machine as Artist Juliette Bessette, Frederic Fol Leymarie, G. W. Smith, 2020-10-21 The articles collected in this volume from the two companion Arts Special Issues, *The Machine as Art* (in the 20th Century) and *The Machine as Artist* (in the 21st Century), represent a unique scholarly resource: analyses by artists, scientists, and engineers, as well as art historians, covering not only the current (and astounding) rapprochement between art and technology but also the vital post-World War II period that has led up to it; this collection is also distinguished by several of the contributors being prominent individuals within their own fields, or as artists who have actually participated in the still unfolding events with which it is concerned

Materials and Processes of Contemporary Sculpture Mahmoud Farag, 2020-01-17 Creating a successful sculpture requires an imaginative concept and a sound design that utilize the potential and avoid the limitations of the material and the process used in making it. Prior to a few decades ago, most sculptors were restricted to carving stone and wood or casting plaster, ceramics and bronze for their creations. Contemporary sculptors, however, are no longer bound by the limitations of these traditional materials and processes, and can now create works in sizes, forms and textures that could not have been achieved previously. Many modern sculptures are now made from materials ranging from steel and aluminum to plastics and composites using processes ranging from welding and adhesive bonding to molding and 3D printing. To fully utilize the full potential of such new materials, the sculptor needs to understand their points of strength, their limitations, and the most effective way of shaping them to achieve a given design. Although this book is written by a materials engineer, the subject matter is presented from the point of view of the sculptor with emphasis on the strengths and weaknesses of different materials, their resistance to weather conditions, natural color and possible surface textures, possible methods of shaping and joining, tools and equipment needed, and safety measures to take. Whenever possible, case studies are used to illustrate the sequence of processes and the cost elements involved in shaping a given material to create an actual work of sculpture.

The Originality of the Avant-Garde and Other Modernist Myths Rosalind E. Krauss, 1986-07-09 Co-founder and co-editor of *October* magazine, a veteran of *Artforum* of the 1960s and early 1970s, Rosalind Krauss has presided over and shared in the major formulation of the theory of postmodernism. In this challenging collection of fifteen essays, most of which originally appeared in *October*, she explores the ways in which the break in style that produced postmodernism has forced a change in our various understandings of twentieth-century art, beginning with the almost mythic idea of the avant-garde.

Krauss uses the analytical tools of semiology, structuralism, and poststructuralism to reveal new meanings in the visual arts and to critique the way other prominent practitioners of art and literary history write about art. In two sections, *Modernist Myths* and *Toward Postmodernism*, her essays range from the problem of the grid in painting and the unity of Giacometti's sculpture to the works of Jackson Pollock, Sol Lewitt, and Richard Serra, and observations about major trends in contemporary literary criticism.

Henri de Toulouse-Lautrec Riva Castleman, 1985

A Touch of Blossom Alison Mairi Syme, John Singer Sargent, 2010 Explores the art of John Singer Sargent in the context of nineteenth-century botany, gynecology, literature, and visual culture. Argues that the artist was elaborating both a period poetics of homosexuality and a new sense of subjectivity, anticipating certain aspects of artistic modernism--Provided by publisher.

Visual Thinking Rudolf Arnheim, 1969 The 35th anniversary of this classic of art theory.
