

Department Of Labour Kzn Health

International Labour Office

Caring for those who care World Health Organization, International Labour Organization, 2022-02-23 Occupational health and safety programmes aim to prevent diseases and injuries arising out of, linked with or occurring in the course of work, while improving the quality and safety of care, safeguarding the health workforce and promoting environmental sustainability in the health sector. This guide provides an overview of the key elements of occupational health and safety programmes for health workers at national, subnational and facility levels, as well as advice for the development and implementation of such programmes.

Health and the Division of Labour Margaret Stacey, Margaret Reid, Christian Heath, Robert Dingwall, 2018-05-11 Originally published in 1978, Health and the Division of Labour examines problems and tensions experienced in health work. The papers analyse inter- and intra-occupational rivalry and consider the impact of new forms of managerial rationality upon the traditional divisions of tasks and prestige in health work. The issues raised here affect public policy in both Britain and the USA: Americans can profit from British work on the position of women in medicine, on unionisation and on managerialism, Britons can learn from Americans work on the political context of both social science and medicine, in looking at renal dialysis policy and at the problems of fieldwork in Latin America.

Caring for those who care World Health Organization,International Labour Organization,2022-02-21 Occupational health and safety programmes aim to prevent diseases and injuries arising out of, linked with or occurring in the course of work, while improving the quality and safety of care, safeguarding the health workforce and promoting environmental sustainability in the health sector. This guide provides an overview of the key elements of occupational health and safety programmes for health workers at national, subnational and facility levels, as well as advice for the development and implementation of such programmes.

Geographies of Health and Development Rachel Bezner Kerr,Isaac Luginaah,2016-03-03 The geographies of health and development is an emerging sub-discipline, tying in with many of the conceptual, theoretical and practical components of other disciplines working in health, health care, economics, and international development. Spatially and theoretically grounded in geography, this collection offers a fresh perspective on the dialectic relationships between health and development. Health problems in a developing context take on much higher rates of prevalence as a result of the varied cultural, structural and economic vulnerabilities of the people they impact. This book begins by exploring some of the circumstances surrounding the distinctive health inequities currently facing many developing countries, including malaria, maternal mortality and HIV/AIDS. This is followed by a discussion of how matters of physical access and human resource issues and, perhaps most importantly, the challenges of financing, together shape the access and utilization of health care. Examining how the environment interacts to influence the health of the people that live there, the next section includes discussion around challenges of food (in)security, and the importance of clean and uncontaminated water for health. Finally, the book explores the influence of globalization on health, specifically within the urban environment, against the backdrop of global health policy.

Sick From Work Paul Bellaby,2019-01-22 First published in 1999, this aims to shift the balance from current concerns about individual behaviour and its health effects to an understanding of the social factors that shape both circumstances and behaviour conducive to health. Its focus is the fact that organized work in paid employment is the common experience of most adults before their sixties, and that individuals have widely varied employment security, working conditions and job control that are likely to affect health (for good and ill) beyond working age itself. It brings together usually disparate work in the sociologies of health and illness and the body; and the sociologies of work and organizations. Importantly, the book is research-based. The argument is supported with primary data that the author has collected in varied workplaces in Britain - a

pottery manufacturer, a food-processing firm and the NHS among them and analysis of official statistics and large data sets, as well as secondary literature which is international in scope. The audience includes first and higher degree students in sociology, health and environmental sciences and management studies.

Changing the Course of AIDS David Dickinson,2011-01-15 Changing the Course of AIDS is an in-depth evaluation of a new and exciting way to create the kind of much-needed behavioral change that could affect the course of the global health crisis of HIV/AIDS. This case study from the South African HIV/AIDS epidemic demonstrates that regular workers serving as peer educators can be as—or even more—effective agents of behavioral change than experts who lecture about the facts and so-called appropriate health care behavior. After spending six years researching the response of large South African companies to the epidemic that is decimating their workforce as well as South African communities, David Dickinson describes the promise of this grassroots intervention—workers educating one another in the workplace and community—and the limitations of traditional top-down strategies. Dickinson's book takes us right into the South African workplace to show how effective and yet enormously complex peer education really is. We see what it means when workers directly tackle the kinds of sexual, gender, religious, ethnic, and broader social and political taboos that make behavior change so difficult, particularly when that behavior involves sex and sexuality. Dickinson's findings show that people who are not officially health care experts or even health care workers can be skilled and effective educators. In this book we see why peer education has so much to offer societies grappling with the HIV/AIDS epidemic and why those interested in changing behaviors to ameliorate other health problems like obesity, alcoholism, and substance abuse have so much to learn from the South African example.
