*The Master Plan of Evangelism, Second Edition, Abridged* Robert Coleman,2006-04 Few books have had as great an impact on the cause of world evangelization in our generation as Robert Coleman's *The Master Plan of Evangelism*.--Billy Graham It all started when Jesus called a few men to follow him and share God's message with their neighbors. We are called to do the same. But evangelism can be difficult--even intimidating. With all the evangelism resources available, where should you turn to find advice on how to share the Good News with others? Robert E. Coleman says the answers aren't found in TV evangelism, easy-evangelism guidebooks, or the latest marketing techniques. Rather, he looks to the Bible, to the ultimate example found in Jesus Christ. For more than forty years this classic, biblical look at evangelism has challenged and instructed over three million readers. Now repackaged for a new generation, *The Master Plan of Evangelism* is as fresh and relevant as ever. Join the movement and discover how you can minister to the people God brings into your life.

All of Statistics Larry Wasserman,2013-12-11 Taken literally, the title *All of Statistics* is an exaggeration. But in spirit, the title is apt, as the book does cover a much broader range of topics than a typical introductory book on mathematical statistics. This book is for people who want to learn probability and statistics quickly. It is suitable for graduate or advanced undergraduate students in computer science, mathematics, statistics, and related disciplines. The book includes modern topics like non-parametric curve estimation, bootstrapping, and classification, topics that are usually relegated to follow-up courses. The reader is presumed to know calculus and a little linear algebra. No previous knowledge of probability and statistics is required. Statistics, data mining, and machine learning are all concerned with collecting and analysing data.
