**Creating the Hudson River Park** Tom Fox, 2024-04-12 The 4-mile-long, 550-acre Hudson River Park is nearing completion and is the largest park built in Manhattan since Central Park opened more than 150 years ago. It has transformed a derelict waterfront, protected the Hudson River estuary, preserved commercial maritime activities, created new recreational opportunities for millions of New Yorkers, enhanced tourism, stimulated redevelopment in adjacent neighborhoods, and set a precedent for waterfront redevelopment. The Park attracts seventeen million visitors annually. Creating the Hudson River Park is a first-person story of how this park came to be. Working together over three decades, community groups, civic and environmental organizations, labor, the real estate and business community, government agencies, and elected officials won a historic victory for environmental preservation, the use and enjoyment of the Hudson River, and urban redevelopment. However, the park is also the embodiment of a troubling trend toward the commercialization of America's public parks. After the defeat of the \$2.4 billion Westway plan to fill 234 acres of the Hudson in 1985, the stage was set for the revitalization of Manhattan's West Side waterfront. Between 1986 and 1998 the process focused on the basics like designing an appropriate roadway, removing noncompliant municipal and commercial activities from the waterfront, implementing temporary improvements, developing the Park's first revenue-producing commercial area at Chelsea Piers, completing the public planning and environmental review processes, and negotiating the 1998 Hudson River Park Act that officially created the Park. From 1999 to 2009 planning and construction were funded with public money and focused on creating active and passive recreation opportunities on the Tribeca, Greenwich Village, Chelsea, and Hell's Kitchen waterfronts. However, initial recommendations to secure long term financial support for the Park from the increase in adjacent real estate values that resulted from the Park's creation were ignored. City and state politicians had other priorities and public funding for the Park dwindled. The recent phase of the project, from 2010 to 2021, focused on "development" both in and adjacent to the Park. Changes in leadership, and new challenges provide an opportunity to return to a transparent public planning process and complete the redevelopment of the waterfront for the remainder of the 21st-century. Fox's first-person perspective helps to document the history of the Hudson River Park, recognizes those who made it happen and those who made it difficult, and provides lessons that may help private citizens and public servants expand and protect the public parks and natural systems that are so critical to urban well-being.

**All that is Solid Melts Into Air** Marshall Berman,1983 The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

**Percy Jackson and the Olympians, Book Five: The Last Olympian** Rick Riordan,2009-05-02 All year the half-bloods have been preparing for battle against the Titans, knowing the odds of victory are grim. Kronos's army is stronger than ever, and with every god and half-blood he recruits, the evil Titan's power only grows. While the Olympians struggle to contain the rampaging monster Typhon, Kronos begins his advance on New York City, where Mount Olympus stands virtually unguarded. Now it's up to Percy Jackson and an army of young demigods to stop the Lord of Time.

*The Political Sublime* Michael J. Shapiro,2018-03-15 In *The Political Sublime* Michael J. Shapiro formulates an original politics of aesthetics through an analysis of the experience of the sublime. Turning away from Kant's analysis of the sublime experience as a validation of the existence of a universal common sense, Shapiro draws on Deleuze, Lyotard, and Rancière to show how incomprehensible events and dilemmas provide openings for new political formations. He approaches the sublime through a range of artistic and cultural texts that address social crises and natural disasters, from the writing of James Baldwin and Ta-Nehisi Coates to the films of Ingmar Bergman and Spike Lee; these works suggest ways to channel the disruptive effects of the sublime into resistance to authority and innovative political initiative. Whether stemming from the threat of nuclear annihilation or the aftermath of an earthquake, the violence of racism and terrorism or the devastation of industrialism, sublime experience, Shapiro contends, allows for a rethinking of events in ways that reveal, redistribute, and create conditions of possibility for alternative communities of sense.

*Here is New York* E. B. White,2011-03-30 In the summer of 1948, E.B. White sat in a New York City hotel room and, sweltering in the heat, wrote a remarkable pristine essay, *Here is New York*. Perceptive, funny, and nostalgic, the author's stroll around Manhattan—with the reader arm-in-arm—remains the quintessential love letter to the city, written by one of America's foremost literary figures. *Here is New York* has been chosen by *The New York Times* as one of the ten best books ever written about the city. *The New Yorker* calls it “the wittiest essay, and one of the most perceptive, ever done on the city.”

*How We Think* John Dewey,1910 Our schools are troubled with a multiplication of studies, each in turn having its own multiplication of materials and principles. Our teachers find their tasks made heavier in that they have come to deal with pupils individually and not merely in mass. Unless these steps in advance are to end in distraction, some clew of unity, some principle that makes for simplification, must be found. This book represents the conviction that the needed steadying and centralizing factor is found in adopting as the end of endeavor that attitude of mind, that habit of thought, which we call scientific. This scientific attitude of mind might, conceivably, be quite irrelevant to teaching children and youth. But this book

also represents the conviction that such is not the case; that the native and unspoiled attitude of childhood, marked by ardent curiosity, fertile imagination, and love of experimental inquiry, is near, very near, to the attitude of the scientific mind. If these pages assist any to appreciate this kinship and to consider seriously how its recognition in educational practice would make for individual happiness and the reduction of social waste, the book will amply have served its purpose. It is hardly necessary to enumerate the authors to whom I am indebted. My fundamental indebtedness is to my wife, by whom the ideas of this book were inspired, and through whose work in connection with the Laboratory School, existing in Chicago between 1896 and 1903, the ideas attained such concreteness as comes from embodiment and testing in practice. It is a pleasure, also, to acknowledge indebtedness to the intelligence and sympathy of those who coöperated as teachers and supervisors in the conduct of that school, and especially to Mrs. Ella Flagg Young, then a colleague in the University, and now Superintendent of the Schools of Chicago.

Decolonizing Methodologies Linda Tuhiwai Smith, 2016-03-15 'A landmark in the process of decolonizing imperial Western knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

*Language Assessment* H. Douglas Brown, 2018-03-16 *Language Assessment: Principles and Classroom Practices* is designed to offer a comprehensive survey of essential principles and tools for second language assessment. Its first and second editions have been successfully used in teacher-training courses, teacher certification curricula, and TESOL master of arts programs. As the third in a trilogy of teacher education textbooks, it is designed to follow H. Douglas Brown's other two books, *Principles of Language Learning and Teaching* (sixth edition, Pearson Education, 2014) and *Teaching by Principles* (fourth edition, Pearson Education, 2015). References to those two books are made throughout the current book. *Language Assessment* features uncomplicated prose and a systematic, spiraling organization. Concepts are introduced with practical examples, understandable explanations, and succinct references to supportive research. The research literature on language assessment can be quite complex and assume that readers have technical knowledge and experience in testing. By the end of *Language Assessment*, however, readers will have gained access to this not-so-frightening field. They will have a working knowledge of a number of useful, fundamental principles of assessment and will have applied those principles to

practical classroom contexts. They will also have acquired a storehouse of useful tools for evaluating and designing practical, effective assessment techniques for their classrooms.

**A Night to Remember** Walter Lord, 2005-01-07 A cloth bag containing eight copies of the title.

*Transitions Theory* Afaf I. Meleis, PhD, DrPS (hon), FAAN, 2010-02-17 It is very exciting to see all of these studies compiled in one book. It can be read sequentially or just for certain transitions. It also can be used as a template for compilation of other concepts central to nursing and can serve as a resource for further studies in transitions. It is an excellent addition to the nursing literature. Score: 95, 4 Stars. --Doody's Understanding and recognizing transitions are at the heart of health care reform and this current edition, with its numerous clinical examples and descriptions of nursing interventions, provides important lessons that can and should be incorporated into health policy. It is a brilliant book and an important contribution to nursing theory. Kathleen Dracup, RN, DNSc Dean and Professor, School of Nursing University of California San Francisco Afaf Meleis, the dean of the University of Pennsylvania School of Nursing, presents for the first time in a single volume her original transitions theory that integrates middle-range theory to assist nurses in facilitating positive transitions for patients, families, and communities. Nurses are consistently relied on to coach and support patients going through major life transitions, such as illness, recovery, pregnancy, old age, and many more. A collection of over 50 articles published from 1975 through 2007 and five newly commissioned articles, *Transitions Theory* covers developmental, situational, health and illness, organizational, and therapeutic transitions. Each section includes an introduction written by Dr. Meleis in which she offers her historical and practical perspective on transitions. Many of the articles consider the transitional experiences of ethnically diverse patients, women, the elderly, and other minority populations. Key Topics Discussed: Situational transitions, including discharge and relocation transitions (hospital to home, stroke recovery) and immigration transitions (psychological adaptation and impact of migration on family health) Educational transitions, including professional transitions (from RN to BSN and student to professional) Health and illness transitions, including self-care post heart failure, living with chronic illness, living with early dementia, and accepting palliative care Organization transitions, including role transitions from acute care to collaborative practice, and hospital to community practice Nursing therapeutics models of transition, including role supplementation models and debriefing models

**The God of Small Things** Arundhati Roy, 2011-07-27 The beloved debut novel about an affluent Indian family forever changed by one fateful day in 1969, from the author of *The Ministry of Utmost Happiness* NEW YORK TIMES BESTSELLER • MAN BOOKER PRIZE WINNER Compared favorably to the works of Faulkner and Dickens, Arundhati Roy's modern classic is equal parts powerful family saga, forbidden love story, and piercing political drama. The seven-year-old twins Estha and Rahel see their world shaken irrevocably by the arrival of their beautiful young cousin, Sophie. It is an event that will lead to an illicit liaison and tragedies accidental and intentional, exposing "big things [that] lurk unsaid" in a country drifting

dangerously toward unrest. Lush, lyrical, and unnerving, *The God of Small Things* is an award-winning landmark that started for its author an esteemed career of fiction and political commentary that continues unabated.

*Hudson Valley Curiosities* Allison Guertin Marchese, 2017-08-21 Hudson Valley is steeped in mysteries, from Celtic chambers resting in the deep woods of Putnam to Millbrook's abandoned Bennett College. The beautiful, tree-spotted landscape of the Hudson Valley hides the strange and sometimes frightening stories of the region. In the Highlands, Iroquois chief Daniel Nimham gave his life for the cause of American independence. The great passenger steamship *Swallow* sank near the shores of Athens. And there is even one strange night in the Catskills where a legendary playwright miraculously survived a midnight plunge off the suspended Schoharie Bridge. Author Allison Guertin Marchese reveals a treasure-trove of curious tales recounting the most uncommon history of bad guys, bold girls, creepy colleges, missing mastodons and more in this wondrous region of New York.

*Should Trees Have Standing?* Christopher D. Stone, 1974 In this book, Professor Stone traces the development of the idea of legal rights, reminding us that children, old people, women, aliens, and minorities have been treated as without rights in many societies throughout human history. Although each new movement to confer rights on some new entity may have seemed odd or frightening or laughable at the time, Stone points out that legal rights have been extended and previously rightless people (and things) have come to be recognized and valued for themselves. He then develops his thesis and proposal that we give legal rights to natural objects in the environment--and to the natural environment as a whole--Back cover.

*Administering and Managing the U.S. Food System* A. Bryce Hoflund, John C. Jones, Michelle C. Pautz, 2021-06-11 Food and the systems that produce, disrupt, prepare it are central to all human life. Yet, scholarly analysis of the food systems that support human life are highly fragmented across a variety of disciplines. Public administration, with its focus on the doing of public policy, would seem to be a logical home for analysis of food systems in action. However, food is largely ignored by public administration scholars, and scholars from other disciplines can unintentionally draw up established public administration literature. The chapters in this edited volume highlight where the lenses and languages of public administration can and should be used to analyze food systems. Viewed collectively, the editors argue that the lenses and languages of public administration can and should become a common ground for scholars and practitioners to discuss food systems.

**Civic Ecology** Marianne E. Krasny, Keith G. Tidball, 2015-01-30 Stories of environmental stewardship in communities from New Orleans to Soweto accompany an interdisciplinary framework for understanding civic ecology as a global phenomenon. In communities across the country and around the world, people are coming together to rebuild and restore local environments that have been affected by crisis or disaster. In New Orleans after Katrina, in New York after Sandy, in Soweto after apartheid, and in any number of postindustrial, depopulated cities, people work together to restore nature,

renew communities, and heal themselves. In *Civic Ecology*, Marianne Krasny and Keith Tidball offer stories of this emerging grassroots environmental stewardship, along with an interdisciplinary framework for understanding and studying it as a growing international phenomenon. Krasny and Tidball draw on research in social capital and collective efficacy, ecosystem services, social learning, governance, social-ecological systems, and other findings in the social and ecological sciences to investigate how people, practices, and communities interact. Along the way, they chronicle local environmental stewards who have undertaken such tasks as beautifying blocks in the Bronx, clearing trash from the Iranian countryside, and working with traumatized veterans to conserve nature and recreate community. Krasny and Tidball argue that humans' innate love of nature and attachment to place compels them to restore nature and places that are threatened, destroyed, or lost. At the same time, they report, nature and community exert a healing and restorative power on their stewards.

World War Z Max Brooks, 2013 An account of the decade-long conflict between humankind and hordes of the predatory undead is told from the perspective of dozens of survivors who describe in their own words the epic human battle for survival, in a novel that is the basis for the June 2013 film starring Brad Pitt. Reissue. Movie Tie-In.

Fundamentals of Geomorphology Richard John Huggett, 2011-03-15 This extensively revised, restructured, and updated edition continues to present an engaging and comprehensive introduction to the subject, exploring the world's landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field. *Fundamentals of Geomorphology* begins with a consideration of the nature of geomorphology, process and form, history, and geomorphic systems, and moves on to discuss: structure: structural landforms associated with plate tectonics and those associated with volcanoes, impact craters, and folds, faults, and joints process and form: landforms resulting from, or influenced by, the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind, and the sea; landforms developed on limestone; and landscape evolution, a discussion of ancient landforms, including palaeosurfaces, stagnant landscape features, and evolutionary aspects of landscape change. This third edition has been fully updated to include a clearer initial explanation of the nature of geomorphology, of land surface process and form, and of land-surface change over different timescales. The text has been restructured to incorporate information on geomorphic materials and processes at more suitable points in the book. Finally, historical geomorphology has been integrated throughout the text to reflect the importance of history in all aspects of geomorphology. *Fundamentals of Geomorphology* provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries, and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour.

**The Cigarette Century** Allan M. Brandt, 2009-01-06 The invention of mass marketing led to cigarettes being emblazoned

in advertising and film, deeply tied to modern notions of glamour and sex appeal. It is hard to find a photo of Humphrey Bogart or Lauren Bacall without a cigarette. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. And no product has received such sustained scientific scrutiny. The development of new medical knowledge demonstrating the dire harms of smoking ultimately shaped the evolution of evidence-based medicine. In response, the tobacco industry engineered a campaign of scientific disinformation seeking to delay, disrupt, and suppress these studies. Using a massive archive of previously secret documents, historian Allan Brandt shows how the industry pioneered these campaigns, particularly using special interest lobbying and largesse to elude regulation. But even as the cultural dominance of the cigarette has waned and consumption has fallen dramatically in the U.S., Big Tobacco remains securely positioned to expand into new global markets. The implications for the future are vast: 100 million people died of smoking-related diseases in the 20th century; in the next 100 years, we expect 1 billion deaths worldwide.

Uses of Heritage Laurajane Smith, 2006-11-22 Examining international case studies including USA, Asia, Australia and New Zealand, this book identifies and explores the use of heritage throughout the world. Challenging the idea that heritage value is self-evident, and that things must be preserved, it demonstrates how it gives tangibility to the values that underpin different communities.

*The Perception of the Environment* Tim Ingold, 2021-11-29 In this work Tim Ingold offers a persuasive new approach to understanding how human beings perceive their surroundings. He argues that what we are used to calling cultural variation consists, in the first place, of variations in skill. Neither innate nor acquired, skills are grown, incorporated into the human organism through practice and training in an environment. They are thus as much biological as cultural. To account for the generation of skills we have therefore to understand the dynamics of development. And this in turn calls for an ecological approach that situates practitioners in the context of an active engagement with the constituents of their surroundings. The twenty-three essays comprising this book focus in turn on the procurement of livelihood, on what it means to 'dwell', and on the nature of skill, weaving together approaches from social anthropology, ecological psychology, developmental biology and phenomenology in a way that has never been attempted before. The book is set to revolutionise the way we think about what is 'biological' and 'cultural' in humans, about evolution and history, and indeed about what it means for human beings - at once organisms and persons - to inhabit an environment. *The Perception of the Environment* will be essential reading not only for anthropologists but also for biologists, psychologists, archaeologists, geographers and philosophers. This edition includes a new Preface by the author.
