Accounting Information Systems James A. Hall,2001 Providing coverage of accounting information systems and related technologies, this text features an early presentation of transaction cycles plus a special emphasis on ethics, fraud, and the modern manufacturing environment. The Enterprise Resource Planning system, SAP, has been integrated into this edition. Featuring screen shots of the SAP Website in the text and a password that links students to a specially created SAP Website, the text provides hands-on exposure to ERP. Also included are chapters on such topics as the Resources, Events, and Agents (REA) approach, Enterprise Resource Planning (ERP) systems, and Electronic Commerce systems. Hall assumes that the student is familiar with fundamental accounting principles and basic computer concepts and terminology and has been exposed to computer programming. The focus is on the needs and responsibilities of accountants as end users of systems,

systems designers, and auditors.

Accounting: Information for Business Decisions Billie Cunningham, Loren A. Nikolai, John Bazley, Marie Kavanagh, Sharelle Simmons, Christina James, 2020-11-03 Accounting Information for Business Decisions is a business-focused introduction to Accounting for all students - not just those intending to be Accounting majors. Lead students through the real-world business cycle and how accounting information informs decision-making. Departing from the traditional approach taken by other introductory accounting textbooks, students apply both managerial and financial approaches within the topics examined in each chapter, to see the direct impact that Managerial Accounting decisions make on the Financial Accounting processes (and vice versa). The conversational writing engages students in the theoretical content and how it applies to contemporary real-world scenarios. Students follow a retail coffee business in the relatable Cafe Revive running case study integrated into every chapter, to learn about applying accounting issues in the real world.
