Organizational Trust Mark N. K. Saunders, Denise Skinner, Graham Dietz, Nicole Gillespie, Roy J. Lewicki, 2010-06-10 The globalized nature of modern organizations presents new and intimidating challenges for effective relationship building. Organizations and their employees are increasingly being asked to manage unfamiliar relationships with unfamiliar parties. These relationships not only involve working across different national cultures, but also dealing with different organizational cultures, different professional cultures and even different internal constituencies. Managing such differences demands trust. This book brings together research findings on organizational trust-building across cultures. Established trust scholars from around the world consider the development and maintenance of trust between, for example, management consultants and their clients, senior international managers from different nationalities, different internal organizational groupings during times of change, international joint ventures, and service suppliers and the local communities they serve. These studies, set in a wide variety of national settings, are an important resource for academics, students and practitioners who wish to know more about the nature of cross-cultural trust-building in organizations.

Benford's Law Mark J. Nigrini, 2012-03-09 A powerful new tool for all forensic accountants, or anyone who analyzes data that may have been altered Benford's Law gives the expected patterns of the digits in the numbers in tabulated data such as town and city populations or Madoff's fictitious portfolio returns. Those digits, in unaltered data, will not occur in equal proportions; there is a large bias towards the lower digits, so much so that nearly one-half of all numbers are expected to start

with the digits 1 or 2. These patterns were originally discovered by physicist Frank Benford in the early 1930s, and have since been found to apply to all tabulated data. Mark J. Nigrini has been a pioneer in applying Benford's Law to auditing and forensic accounting, even before his groundbreaking 1999 Journal of Accountancy article introducing this useful tool to the accounting world. In Benford's Law, Nigrini shows the widespread applicability of Benford's Law and its practical uses to detect fraud, errors, and other anomalies. Explores primary, associated, and advanced tests, all described with data sets that include corporate payments data and election data. Includes ten fraud detection studies, including vendor fraud, payroll fraud, due diligence when purchasing a business, and tax evasion. Covers financial statement fraud, with data from Enron, AIG, and companies that were the target of hedge fund short sales. Looks at how to detect Ponzi schemes, including data on Madoff, Waxenberg, and more. Examines many other applications, from the Clinton tax returns and the charitable gifts of Lehman Brothers to tax evasion and number invention. Benford's Law has 250 figures and uses 50 interesting authentic and fraudulent real-world data sets to explain both theory and practice, and concludes with an agenda and directions for future research. The companion website adds additional information and resources.

Women in Public Relations Larissa A. Grunig, Linda Childers Hon, Elizabeth L. Toth, 2013-09-13 The past 20 years have seen an influx of women into the practice of public relations, yet gender-based disparities in pay and advancement remain a troubling reality. As the field becomes feminized, moreover, female and male practitioners alike confront the prospect of dwindling salaries and prestige. This landmark book presents a comprehensive examination of the status of women in public relations and proposes concrete ways to achieve greater parity in education and practice. The authors integrate the theoretical literature of public relations and gender with results of a major longitudinal study of women in the field, along with illuminating focus group and interview data. Topics covered include factors contributing to sex discrimination; how public relations stacks up against other professions on gender-related issues; the challenges facing female managers and entrepreneurs; the experiences of ethnic minority professionals; the salary gap; the glass ceiling; and how to foster solutions on individual, organizational, and societal levels. This volume is an essential read for both educators and practitioners in public relations. It can be used as a course text in graduate research seminars, and also as a supplemental text in courses addressing gender issues in PR. It serves as a useful guide for young practitioners entering the profession, and provides critical insights for public relations managers.

Black Sun Rising C.S. Friedman,1992-09-01 Over a millennium ago, Erna, a seismically active yet beautiful world was settled by colonists from far-distant Earth. But the seemingly habitable planet was fraught with perils no one could have foretold. The colonists found themselves caught in a desperate battle for survival against the fae, a terrifying natural force with the power to prey upon the human mind itself, drawing forth a person's worst nightmare images or most treasured dreams and indiscriminately giving them life. Twelve centuries after fate first stranded the colonists on Erna, mankind has achieved an uneasy stalemate, and human sorcerers manipulate the fae for their own profit, little realizing that demonic forces which feed upon such efforts are rapidly gaining in strength. Now, as the hordes of the dark fae multiply, four people—Priest, Adept, Apprentice, and Sorcerer—are about to be drawn inexorably together for a mission which will force them to confront an evil beyond their imagining, in a conflict which will put not only their own lives but the very fate of humankind in jeopardy.

Discovered Noah's Ark , Hardcover Ron Wyatt1,Mary Nell Wyatt Lee,2014-06-11 Archaeological discovery of Noah's Ark by Ron Wyatt in Northern Turkey.

Double Dead Chuck Wendig,2011 Coburn's been dead now for close to a century, but seeing as how he's a vampire and all, it doesn't much bother him. Or at least it didn't, not until he awoke from a forced five-year slumber to discover that most of human civilization was now dead--but not dead like him, oh no. See, Coburn likes blood. The rest of the walking dead, they like brains. He's smart. Them, not so much. But they outnumber him by about a million to one. And the clotted blood of the walking dead cannot sustain him. Now he's starving. And nocturnal. And more pissed-off than a bee-stung rattlesnake. The vampire not only has to find human survivors (with their sweet, sweet blood), but now he has to transition from predator to protector--after all, a man has to look after his food supply.

Recapture the Rapture Jamie Wheal,2021-04-27 “A highly personal, richly informed and culturally wide-ranging meditation on the loss of meaning in our times and on pathways to rediscovering it.” —Gabor Maté, MD, author of *In The Realm of Hungry Ghosts: Close Encounters With Addiction* A neuroanthropologist maps out a revolutionary new practice—Hedonic Engineering—that combines the best of neuroscience and optimal psychology. It’s an intensive program of breathing, movement, and sexuality that mends trauma, heightens inspiration and tightens connections—helping us wake up, grow up, and show up for a world that needs us all. This is a book about a big idea. And the idea is this: Slowly over the past few decades, and now suddenly, all at once, we’re suffering from a collapse in Meaning. Fundamentalism and nihilism are

filling that vacuum, with consequences that affect us all. In a world that needs us at our best, diseases of despair, tribalism, and disaster fatigue are leaving us at our worst. It's vital that we regain control of the stories we're telling because they are shaping the future we're creating. To do that, we have to remember our deepest inspiration, heal our pain and apathy, and connect to each other like never before. If we can do that, we've got a shot at solving the big problems we face. And if we can't? Well, the dustbin of history has swallowed civilizations older and fancier than ours. This book is divided into three parts. The first, *Choose Your Own Apocalypse*, takes a look at our current Meaning Crisis--where we are today, why it's so hard to make sense of the world, what might be coming next, and what to do about it. It also makes a case that many of our efforts to cope, whether anxiety and denial, or tribalism and identity politics, are likely making things worse. The middle section, *The Alchemist Cookbook*, applies the creative firm IDEO's design thinking to the Meaning Crisis. This is where the book gets hands on--taking a look at the strongest evolutionary drivers that can bring about inspiration, healing, and connection. From breathing, to movement, sexuality, music, and substances--these are the everyday tools to help us wake up, grow up, and show up. AKA--how to blow yourself sky high with household materials. And the best part? They're accessible, by anyone anywhere, no middleman required. Transcendence democratized. The final third of the book, *Ethical Cult Building*, focuses on the tricky nature of putting these kinds of experiences into gear and into culture—because, anytime in the past when we've figured out combinations of peak states and deep healing, we've almost always ended up with problematic culty communities. Playing with fire has left a lot of people burned. This section lays out a roadmap for sparking a thousand fires around the world--each one unique and tailored to the needs and values of its participants. Think of it as an open-source toolkit for building ethical culture. In *Recapture the Rapture*, we're taking radical research out of the extremes and applying it to the mainstream--to the broader social problem of healing, believing, and belonging. It's providing answers to the questions we face: how to replace blind faith with direct experience, how to move from broken to whole, and how to cure isolation with connection. Said even more plainly, it shows us how to revitalize our bodies, boost our creativity, rekindle our relationships, and answer once and for all the questions of why we are here and what do we do now? In a world that needs the best of us from the rest of us, this is a book that shows us how to get it done.
